DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel M. De Vos on April 15, 2005.

The application has been amended as follows:

In The Claims

Claims 1-13, 19-48, and 54 are cancelled.

14. (Currently Amended) A machine-readable medium that provides instructions, which when executed by a set of processors, cause said set of processors to perform operations comprising:

transmitting a first set of traffic at a first rate on a first span of an optical ring;

transmitting a second set of traffic at the first rate on a second span of the optical ring;

reducing transmission of the first set of traffic to a second rate while there is a failure on the second span;

switching the second set of traffic to the first span; ~~and~~

transmitting the second set of traffic at a third rate while there is a failure on the second span; and

Art Unit: 2667

wherein the first set of traffic is transmitted in a non-contiguous set of physical channels and the first set of traffic is fractionally concatenated.

49. (Currently Amended) A computer implemented method comprising:
- transmitting a first set of traffic at a first rate on a first span of an optical ring;
 - transmitting a second set of traffic at the first rate on a second span of the optical ring;
 - reducing transmission of the first set of traffic to a second rate while there is a failure on the second span;
 - switching the second set of traffic to the first span; ~~and~~
 - transmitting the second set of traffic at a third rate while there is a failure on the second span; and

wherein the first set of traffic is transmitted in a non-contiguous set of physical channels and the first set of traffic is fractionally concatenated.

Allowable Subject Matter

2. Claims 14-18 and 49-53 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest the steps of reducing transmission of the first set of traffic to a second rate while there is a failure on the second span; switching the second set of traffic to the first span; transmitting the second set of traffic at a third rate while there is a failure on the second span; and wherein the first set of traffic is transmitted in a non-

contiguous set of physical channels and the first set of traffic is fractionally concatenated, as specified in independent claims 14 and 49.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
